- **ANTI SCRATCHES TREATMENT**
- **CE CERTIFICATION**
- **REGULATION (EU) 2016/425**
- **NORMS:** EN 166:2001
- **VISOR:** THE VISOR IS MANUFACTURED OF 1.0 mm THICK POLYCARBONATE.

PANORAMA face shield has been designed to offer effective protection against the risk of particle impact at high speed and medium energy and as protection against drops and liquid splashes. Protection against electric arc short-circuit, protection against gas and fine dust particles, protection against hot solid and molten material.

PANORAMA is manufactured with high quality black PPE. The visor is attached to the browguard by means of three centre pins. The browguard also contains a slot on each side in order to hold a bolt-nut system which is very reliable and flexible.

The headgear system is composed of a harness and adjustment system, manufactured of injection-moulded black PPE. The harness comprises two parts, an upper cross strap and a contour strap. The length of the cross strap can be adjusted by means of the holes and anchor stud system or specially design rocket system. The contour strap has a middle section (which rests on the wearer's forehead) and side arms that join at the rear of the head by means of the adjustment system. For greater comfort, it has a frontal anti-sweat textile band and a foam on the front at the contact point with the users head.
